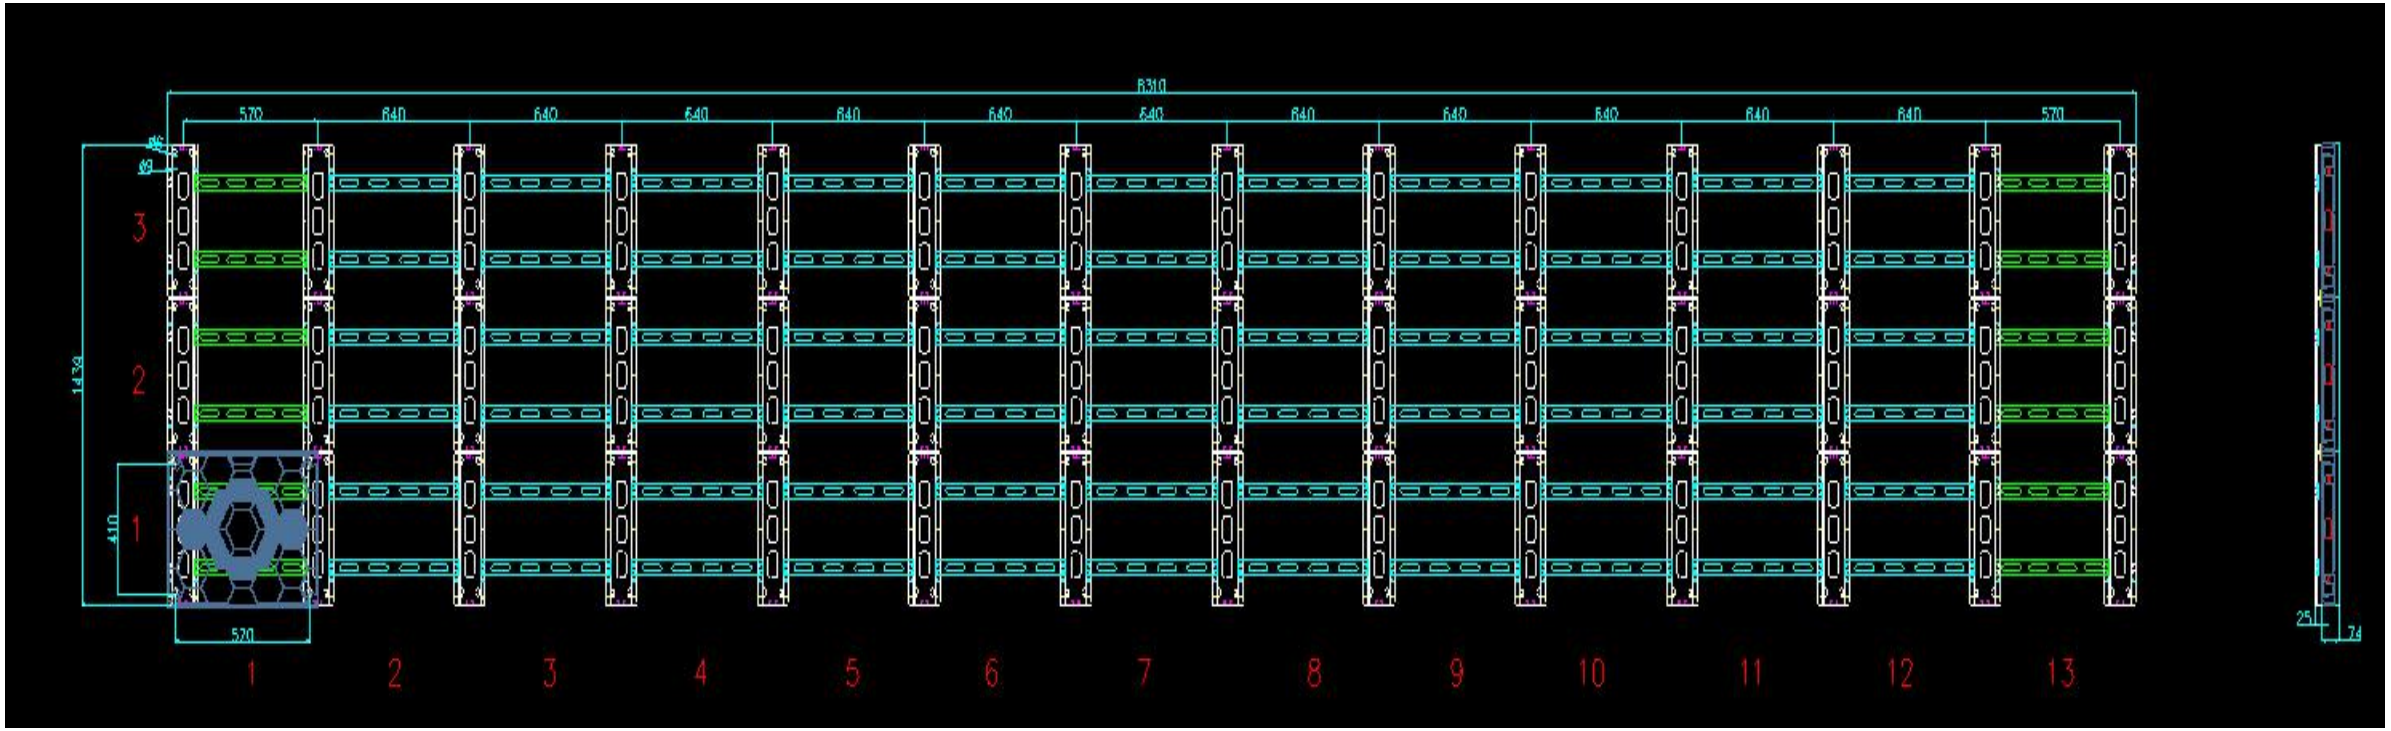
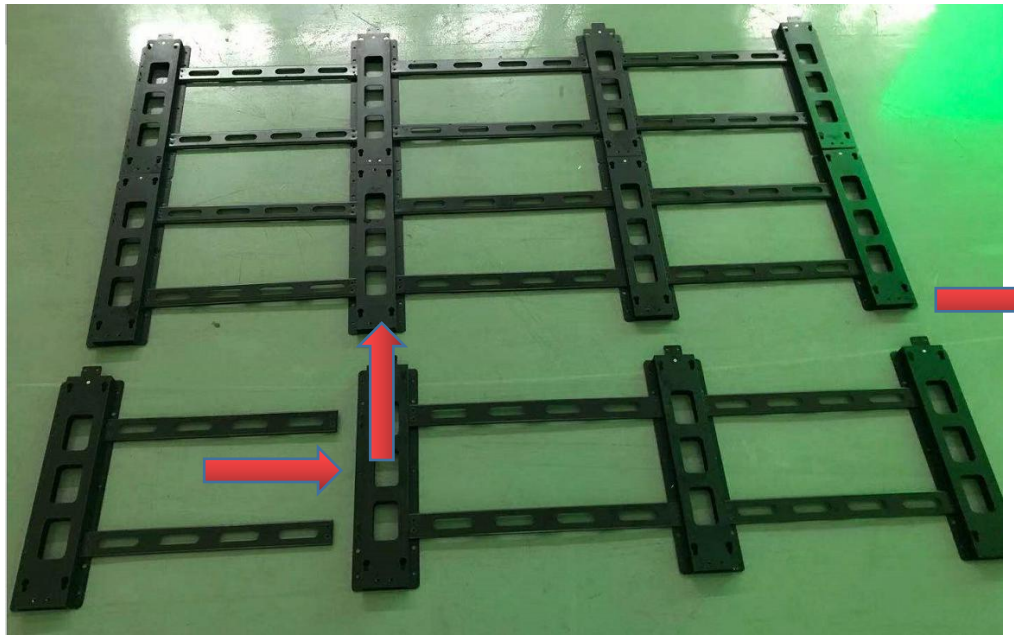
Step 1

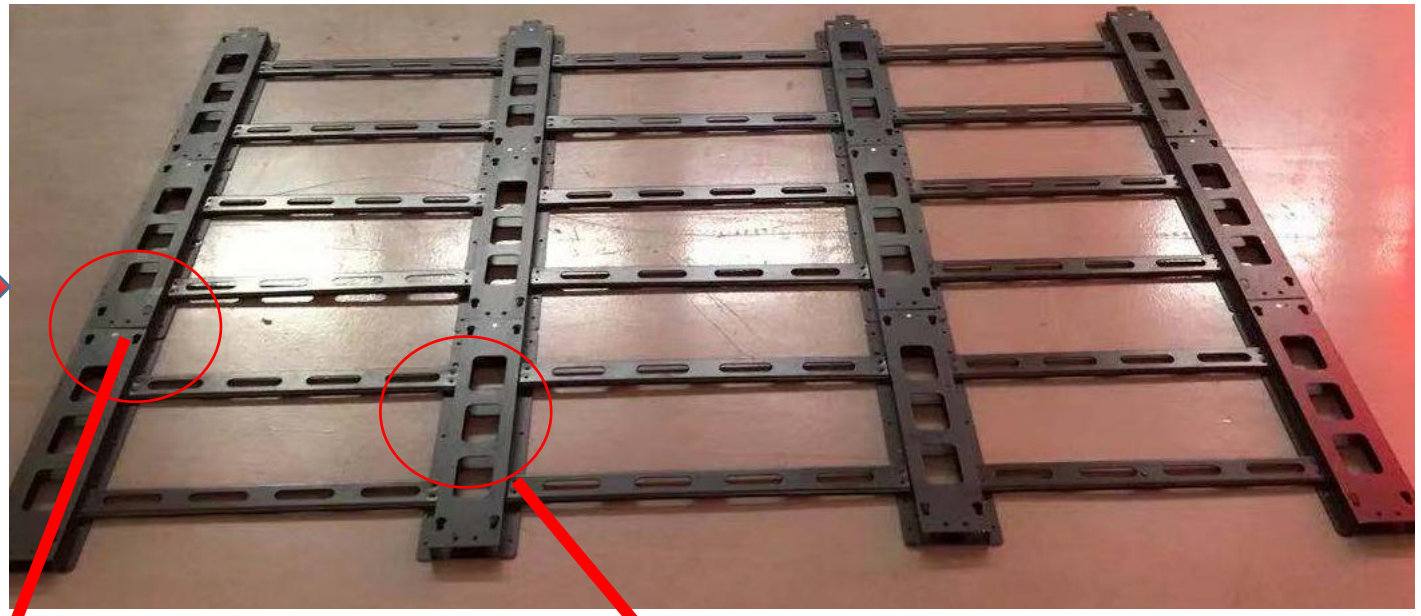
Open the CAD file for checking the bracket installation to the solid wall firstly.

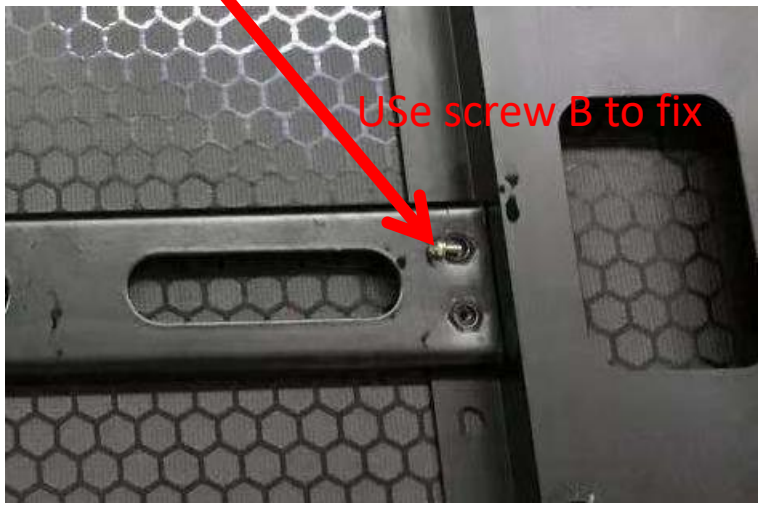


This is the layout of brackets for supporting the cabinets to the wall. If you do not know how to place the bracket. You can try them on the floor like the pictures below.

Step2 Brackets connection





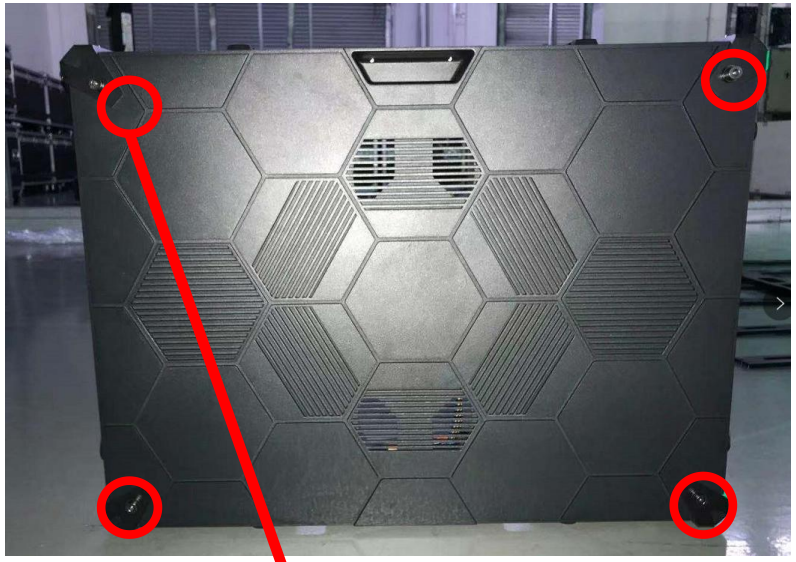


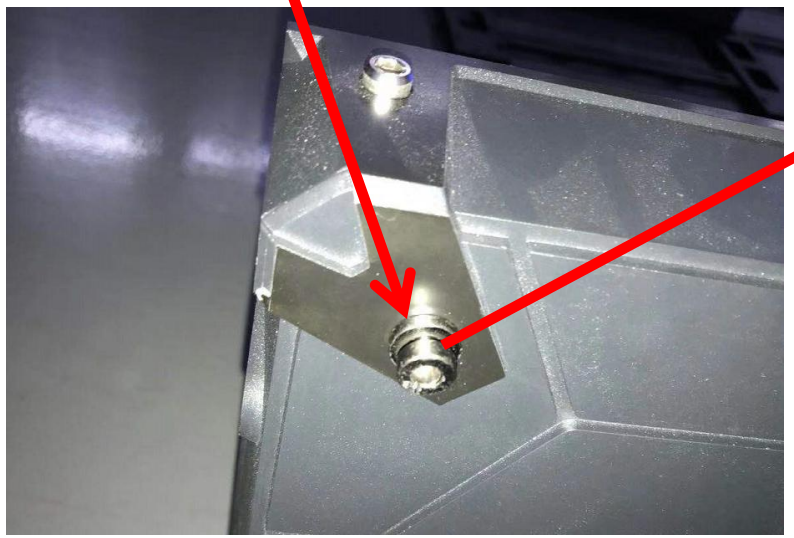
Step 3 Brackets to the wall

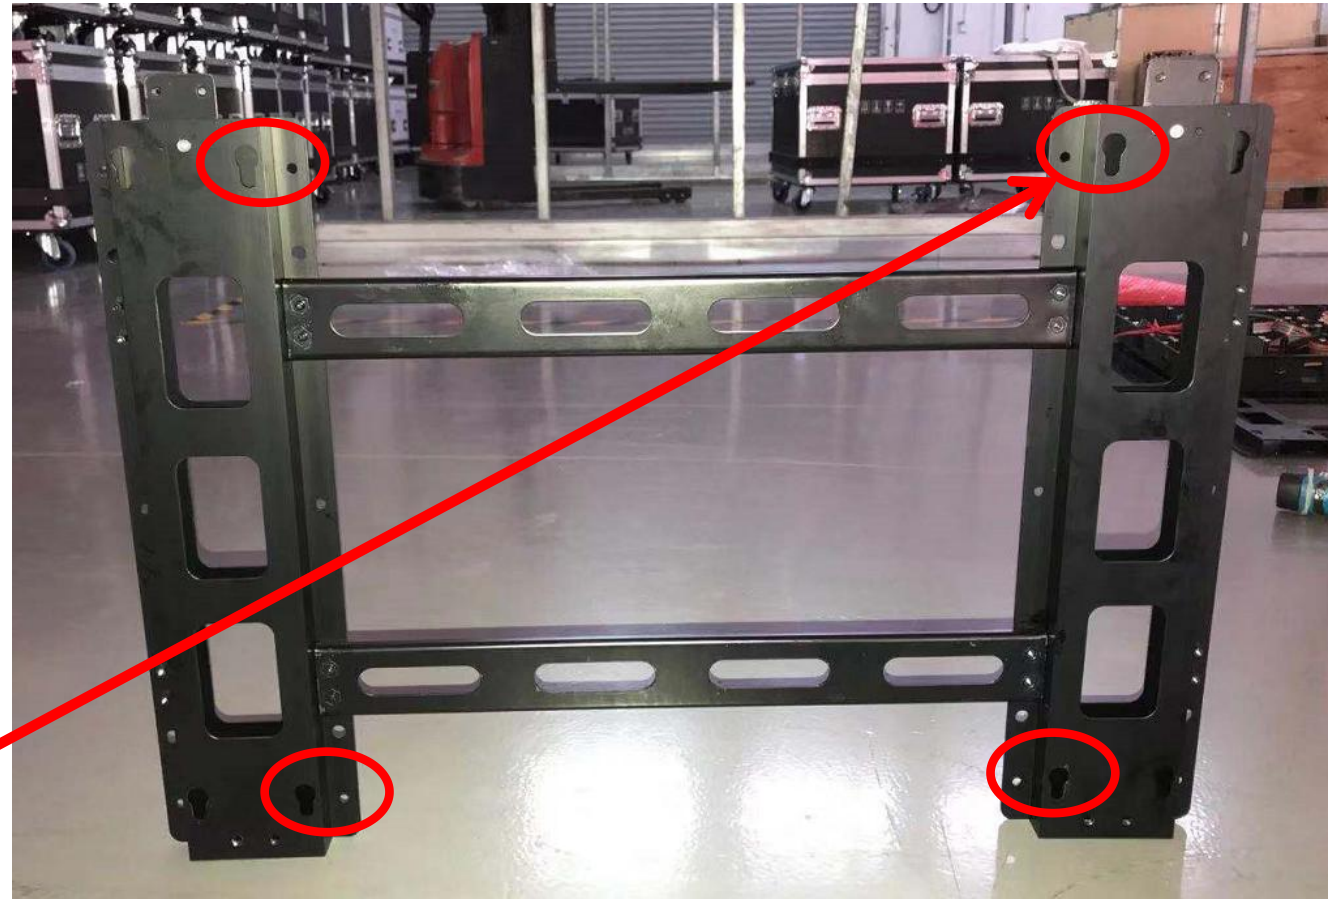
expansion screw

4 pcs Screw holes for each side to fix the bracket to the wall.
You need to buy expansion screws like the picture in your local to fix the brackets.

Step4 Cabinets to the bracket



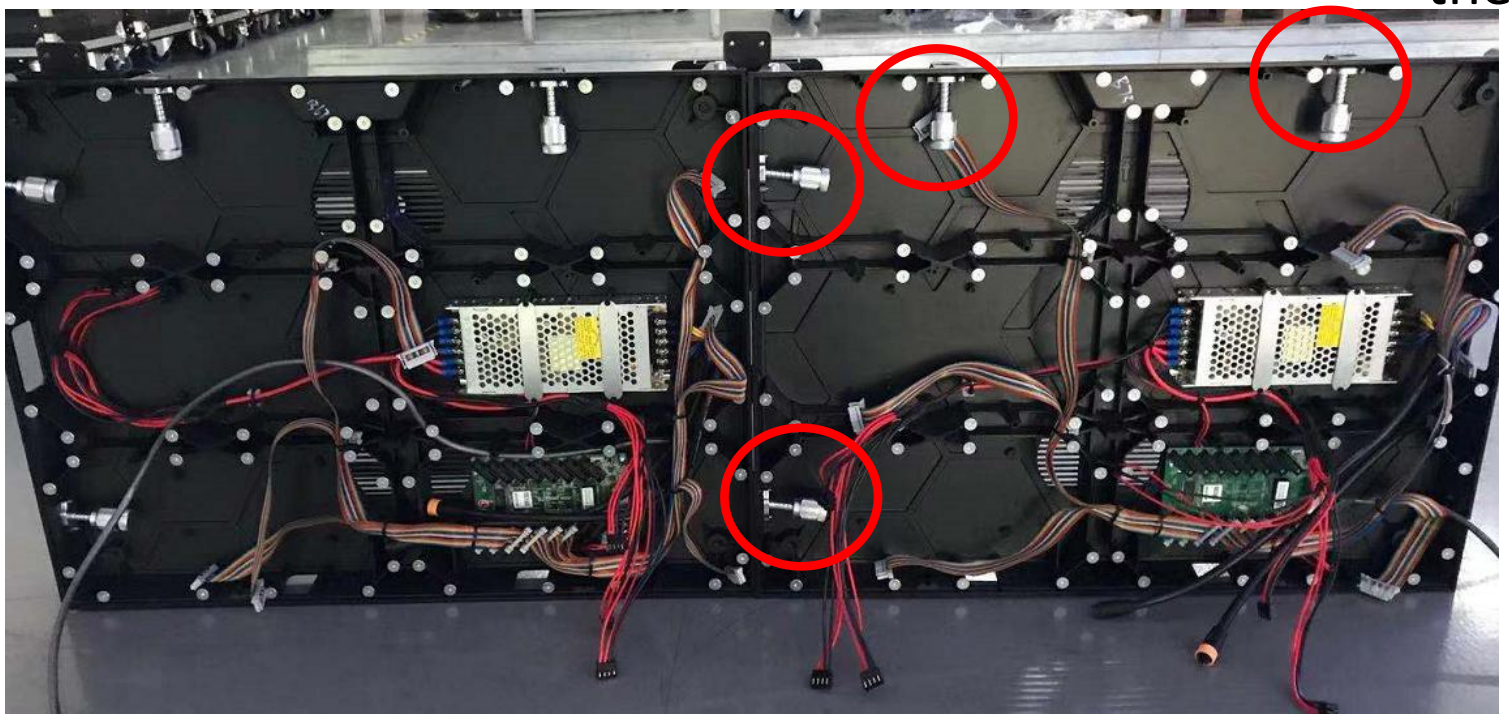




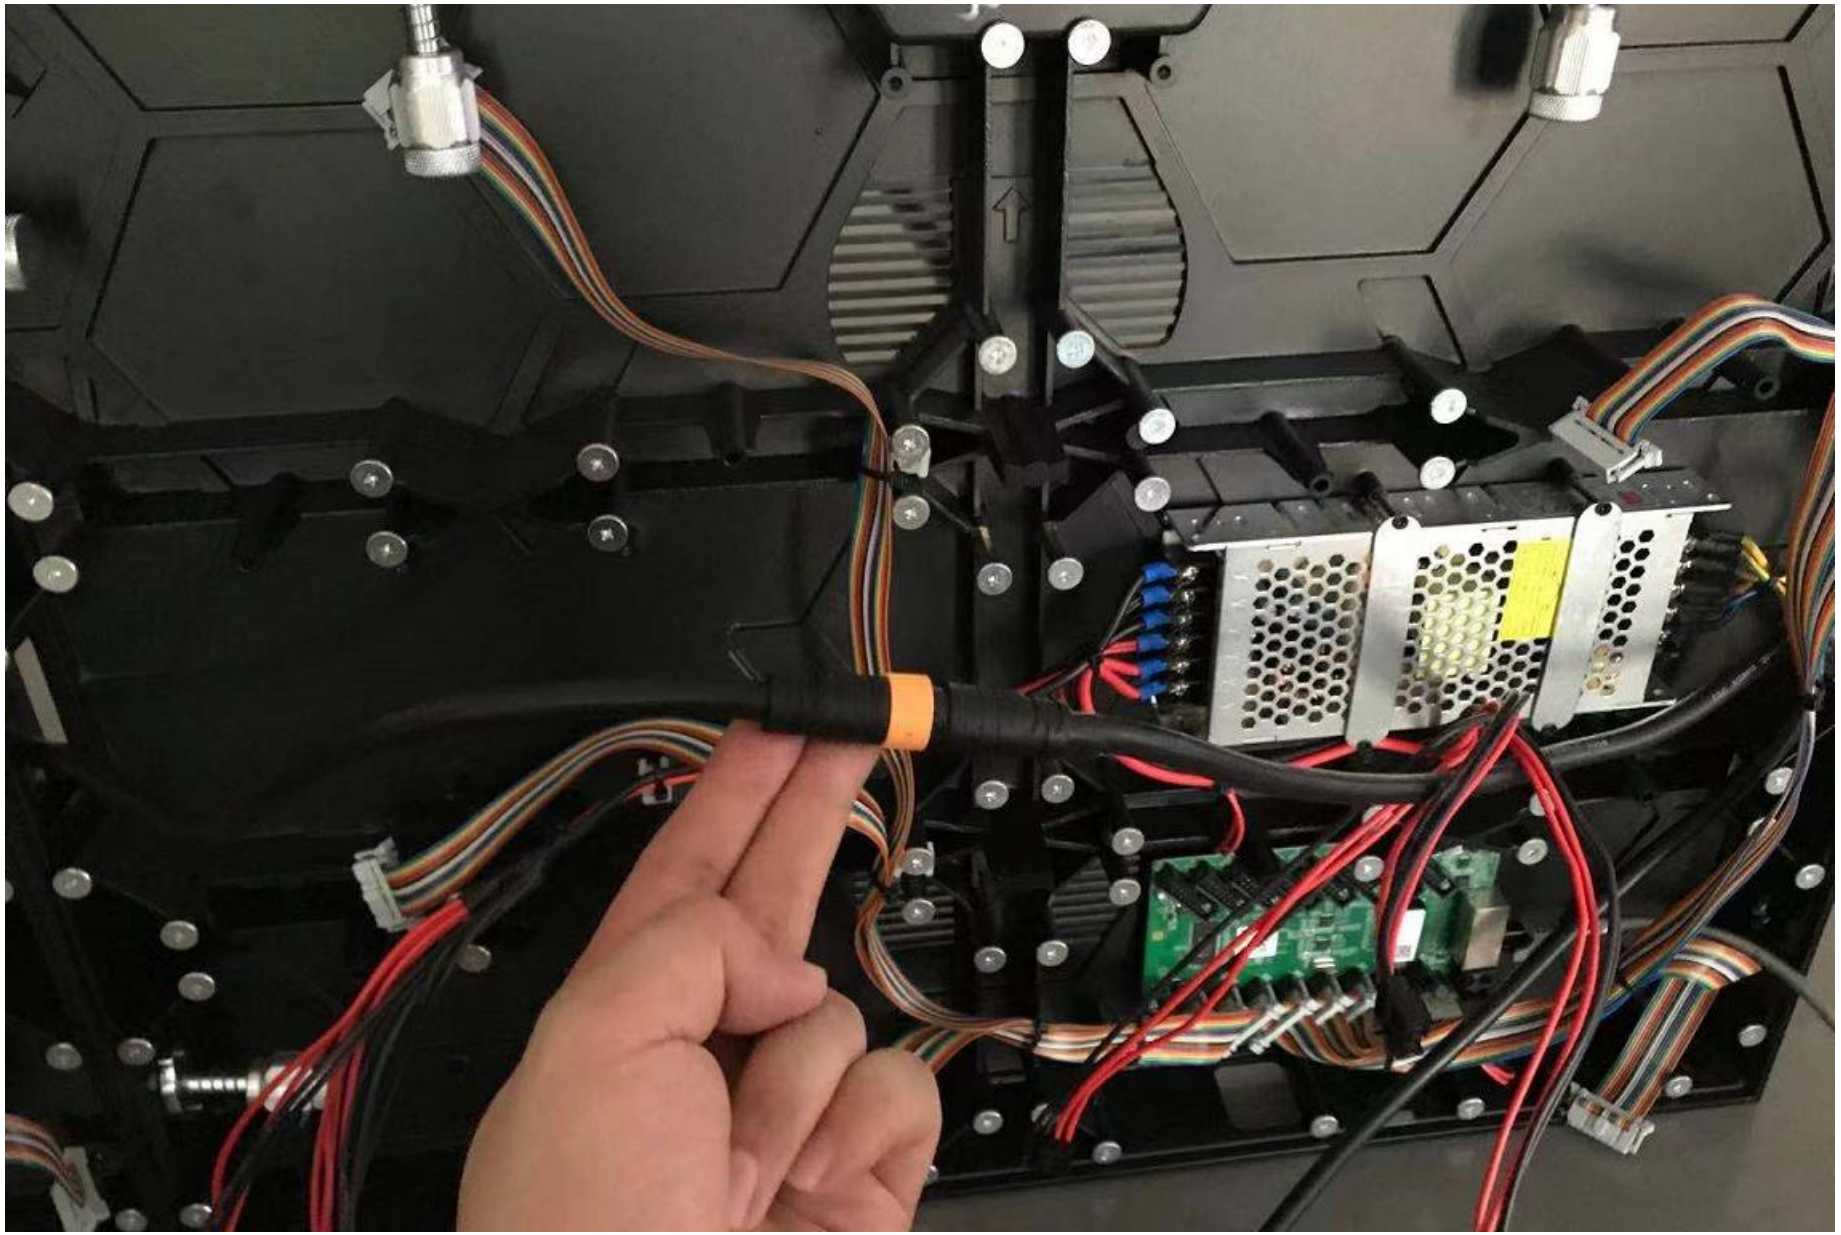
There are 4 poles for each cabinet. We can easy to hang the cabinets on bracket by 4 poles.

Step 5 Cabinets to Cabinet assembly

Each Cabinet has 4 locks like this.
We will use lock to fix the cabinet up and down. Left and right.
How to use the lock,please check the video we sent.

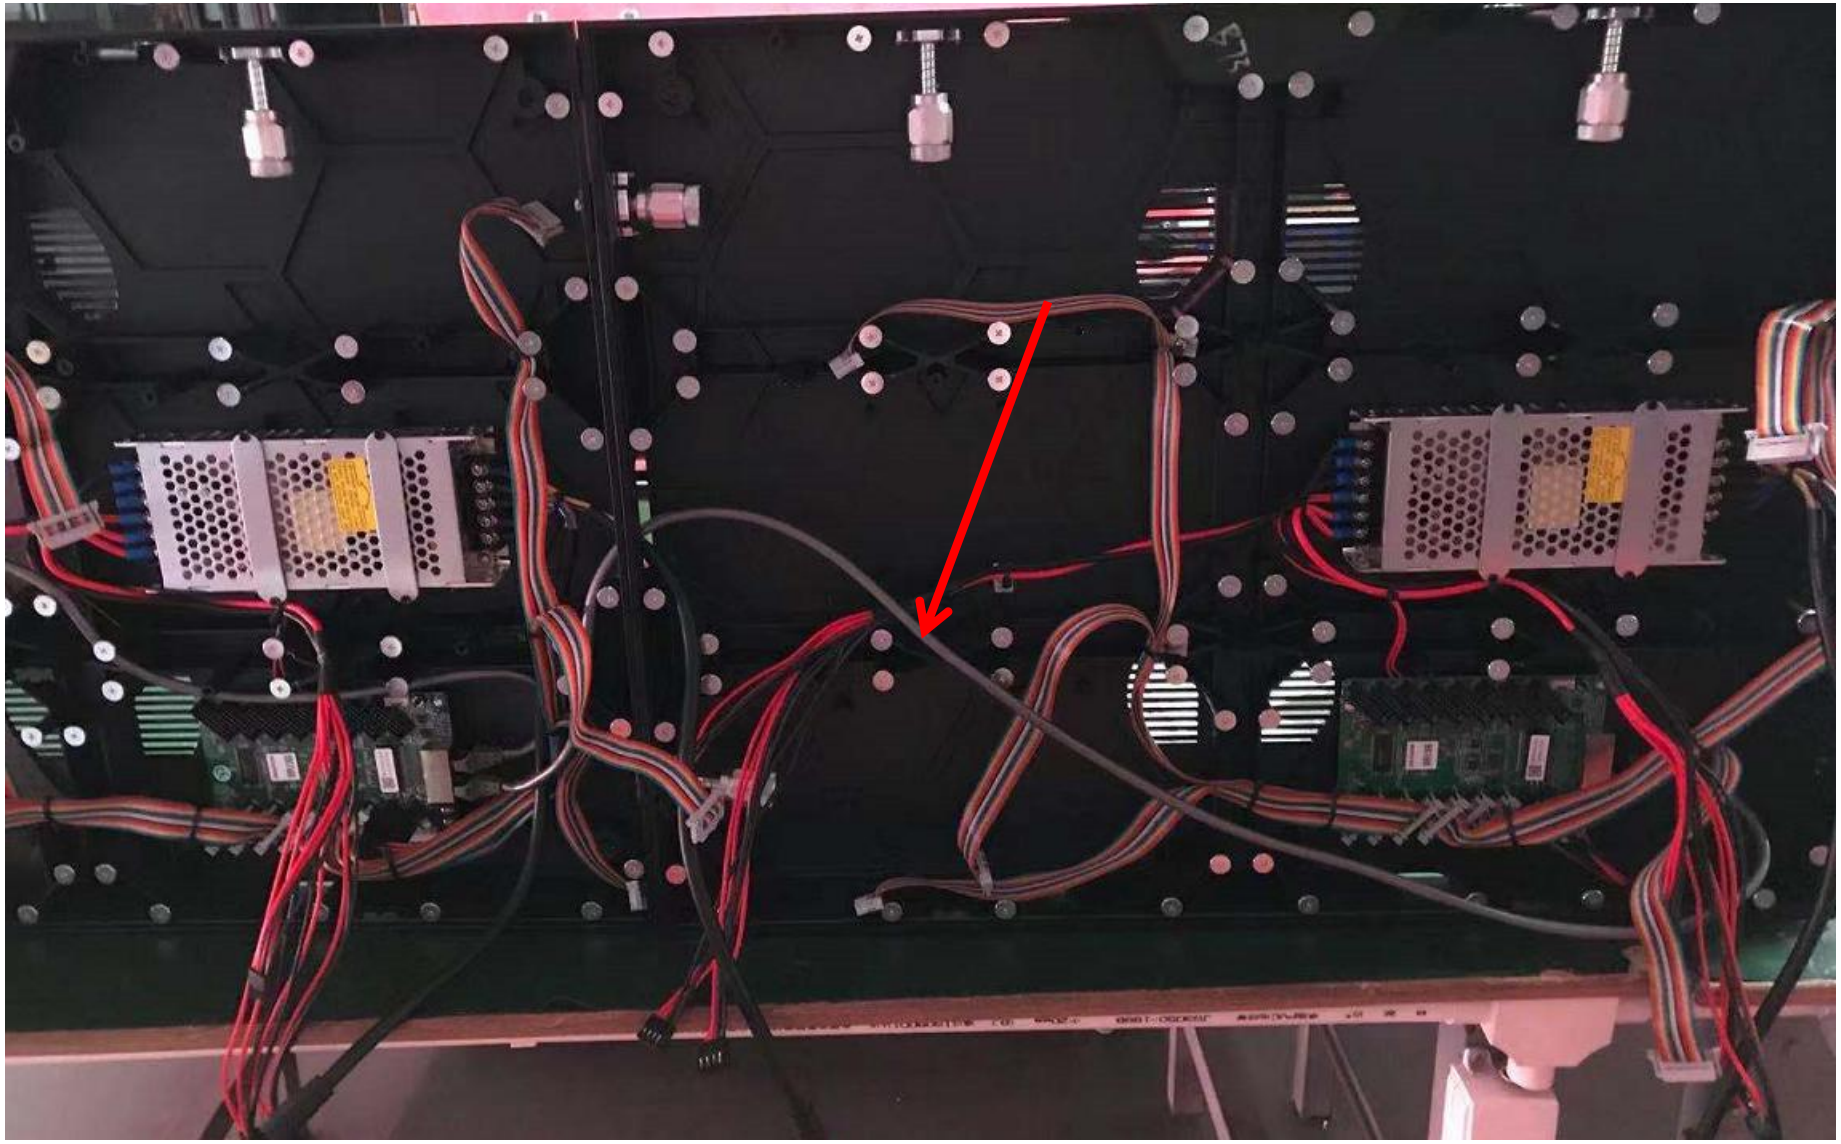


Step 6 Power cable connection between Cabinets



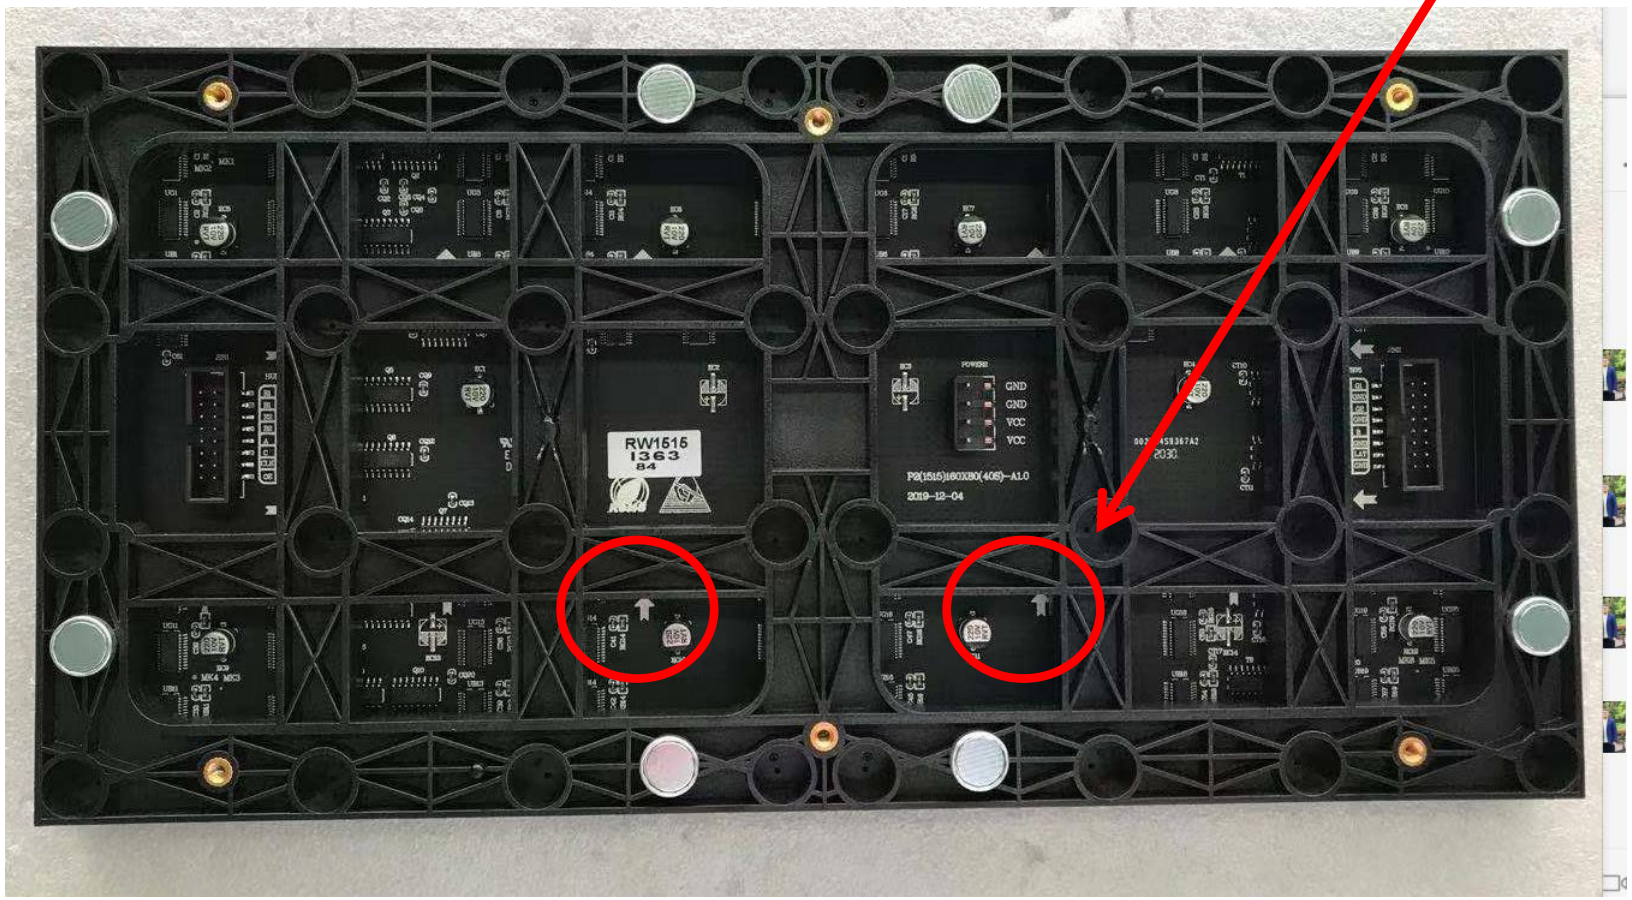
Step 7 Lan cable connection between Cabinets

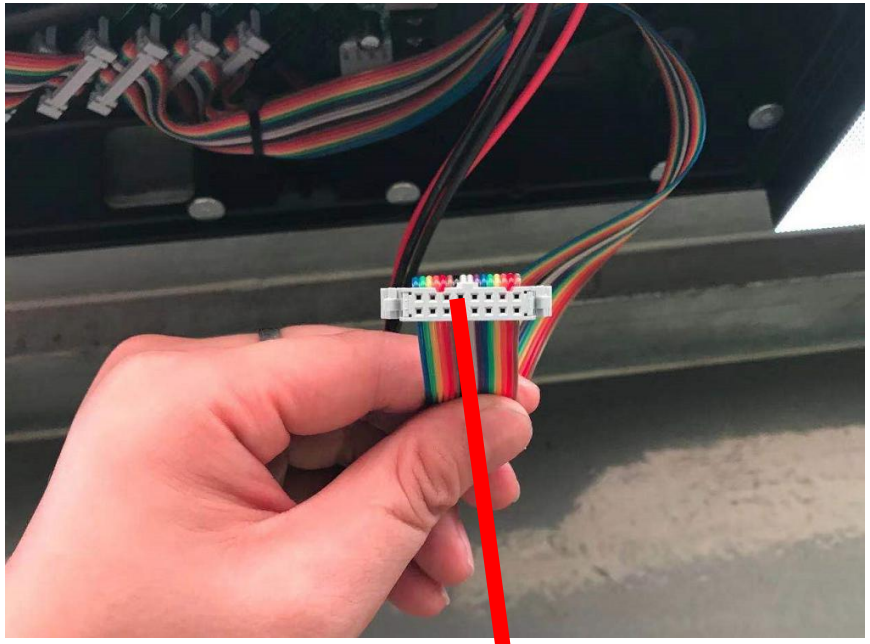
Lan Cable connect receiving card in each cabinet together like below picture.

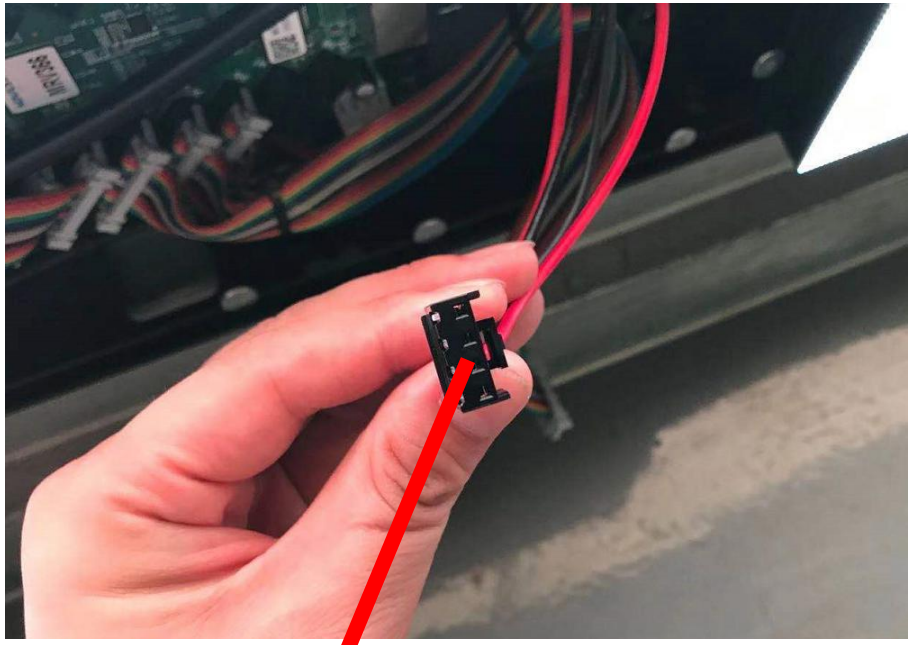


Step 7 Give Power and signal to modules

Pay attention to the direction of placing the modules, make sure the arrow up.

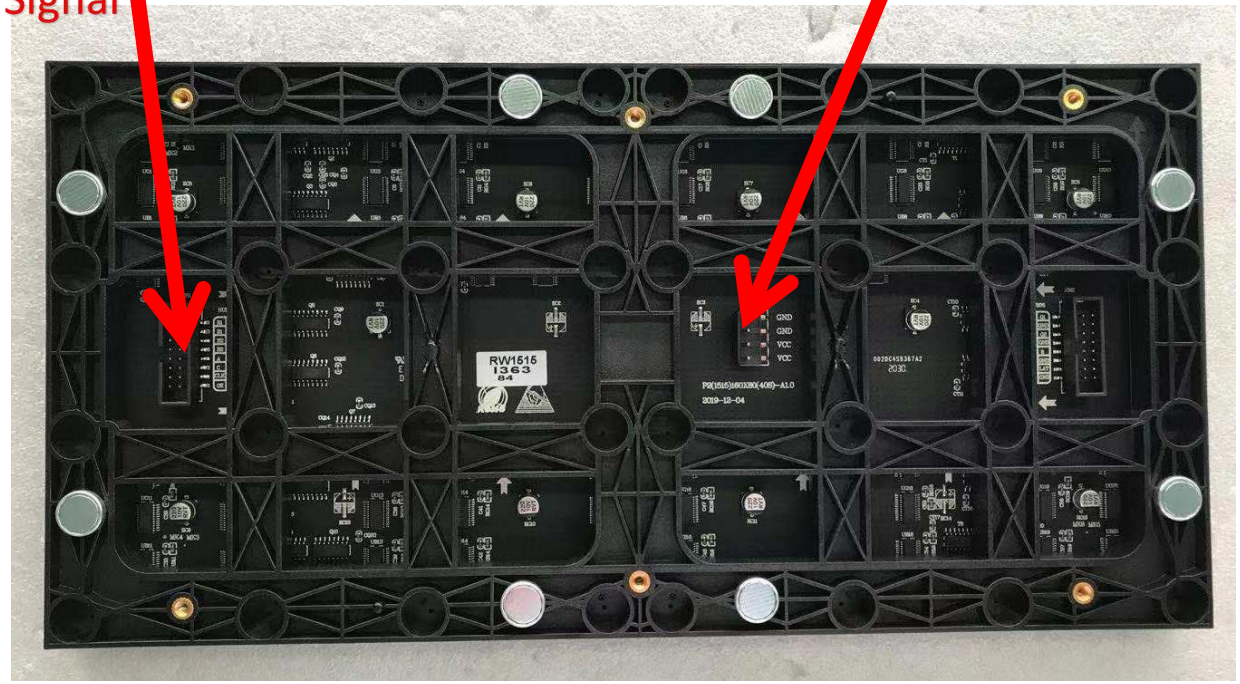




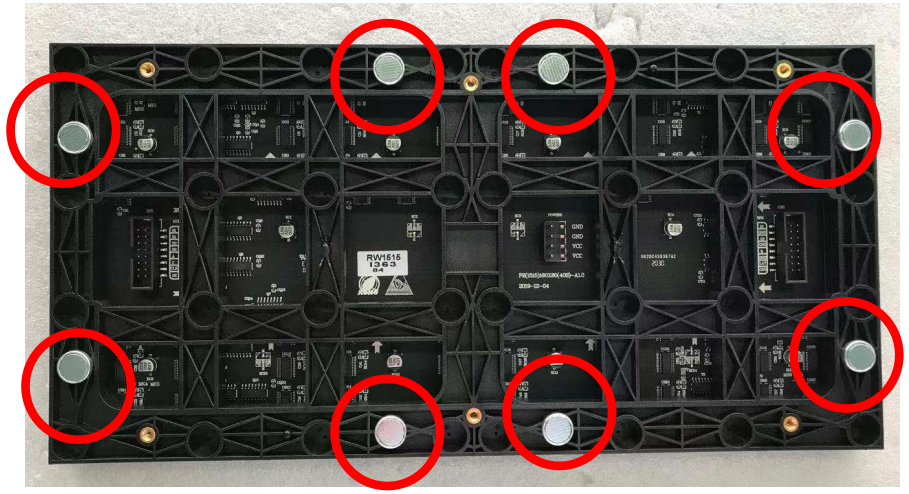


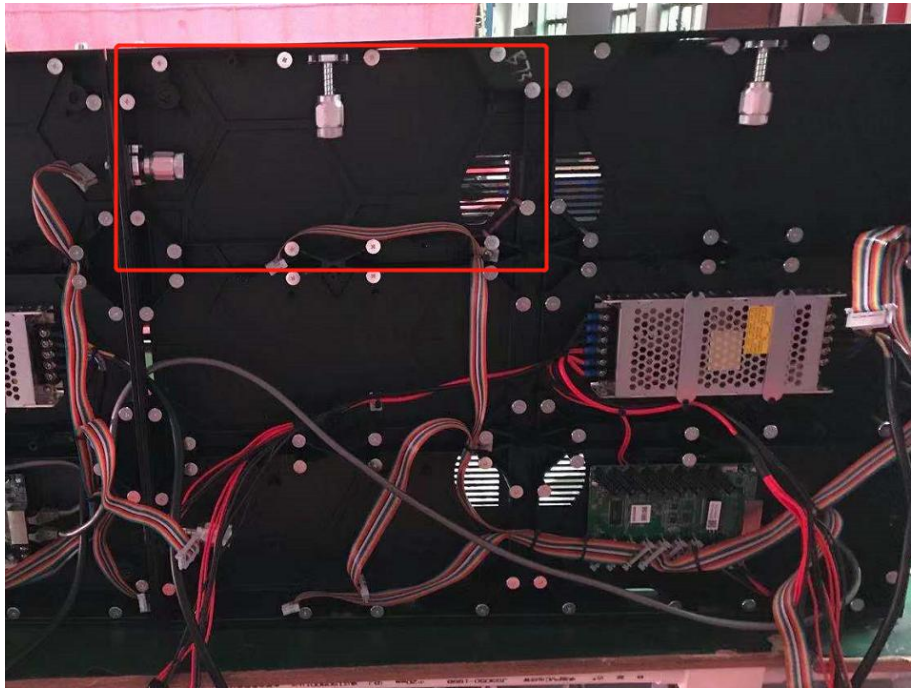
Signal

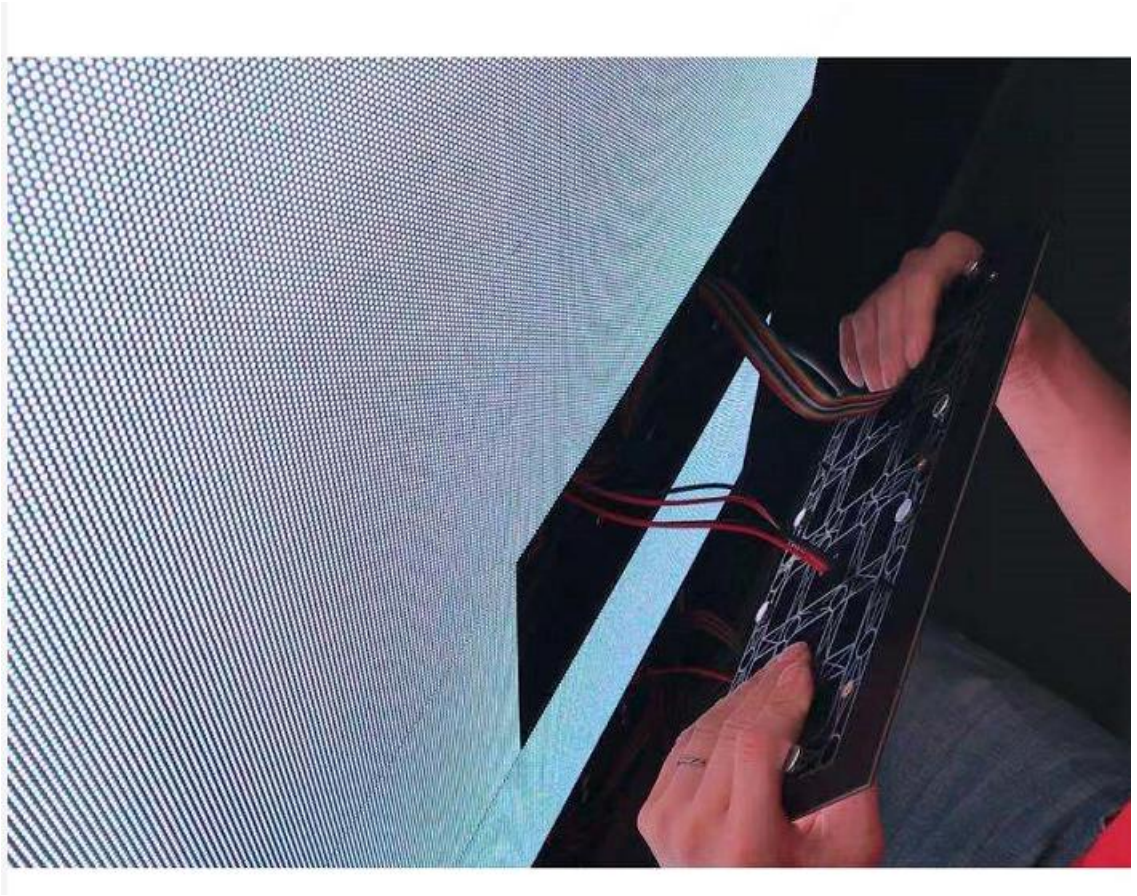
POWER



Step 7 Modules to Cabinet. (Modules and Cabinets are package separately)







Total 8pcs of magnetic plates to connect with 8 places in cabinet accordingly. We can take off the modules by maintenance tool.
